27.1 We ensure that regular guidance and training is arranged on induction and at regular intervals thereafter so that staff and volunteers understand what is expected of them by this policy and have the necessary knowledge and skills to carry out their roles.

27.2 The level and frequency of training depends on the role of the individual member of staff.

27.3 The School maintains written records of all staff training.

28 Reporting requirements and record keeping

28.1 There is a legal obligation to report certain accidents, diseases, incidents, dangerous occurrences and / or near misses to the HSE under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (**RIDDOR**). Reporting is most easily done online at www.riddor.gov.uk. Fatal and "specified" injuries can also be reported by calling 0845 300 9923. Further guidance in relation to RIDDOR reporting can be found on the HSE website.

- 28.2 The Head is responsible for ensuring that the School complies with its reporting and record keeping obligations.
- 28.3 The Head is responsible for reporting accident, diseases and dangerous occurrences to the HSE or enforcing authority.
- 28.4 If anyone at the School is known or suspected to be suffering from disease which is classified as a notifiable disease, and / or in the opinion of a registered medical practitioner has an infection and / or is contaminated in a manner which could present significant harm to human health (as set out in the Health Protection (Notification) Regulations 2010), the School should ensure that a report is made by the proper officer at the relevant local authority. More information can be found at:
<https://www.gov.uk/government/organisations/public-health-england>.
- 28.5 ILG will also consider whether the School is required to report the accident incident to any other regulatory body or organisation.
- 28.6 The School will notify local child protection agencies, as appropriate, of any serious accident or injury to, or the death of, any pupil or other child whilst in their care and act on any advice given.
- 28.7 Details of injuries, conditions, dangerous occurrences and occupational diseases should also be kept in an accident record book which must be kept for at least three years from the date of the last injury.
- 28.8 Following an incident or accident the School will take all reasonable steps to collect and preserve relevant evidence and documentation.
- 28.9 The School will not keep evidence and documentation containing personal information which has been collated as a result of an accident or incident for any longer than is reasonably necessary in compliance with the School's data protection obligations.
- 28.10 Where there is a risk of litigation, enforcement action or other proceedings, against or on behalf of the School, documents (which includes electronic documents) will generally be retained for at least six years unless:
- 28.10.1 the accident or incident involved a pupil or anyone else who was under the age of 18 at the time of the incident, in which case documentation will generally be retained at least until that person's 24th birthday, or
- 28.10.2 the accident or incident may have resulted in exposure to a substance which may be hazardous to health, such as asbestos, and / or there is a risk that any person may develop an occupational disease or illness or work-related medical condition, in which case records should be retained for a minimum of 40 years.
- 28.11 All records created in accordance with this policy are managed in accordance with the School's policies that apply to the retention and destruction of records.
- 28.12 Where there are specific record keeping requirements under this policy, these are set out below:
- 28.12.1 all reported breaches of this policy will be recorded and this record will be reviewed annually by the Head

28.13 The records created in accordance with this policy may contain personal data. The School has a number of privacy notices which explain how the School will use personal data about pupils and parents. The privacy notices are published on the School's website. In addition, staff must ensure that they follow the School's data protection policies and procedures when handling personal data created in connection with this policy. This includes the School's data protection policy.

29 Monitoring and internal investigation

29.1 We monitor health and safety both actively and reactively. The Proprietor accept overall responsibility for, monitoring health and safety performance and for ensuring that the School meets the required health and safety standards.

29.2 At an operational level, the Head is responsible for, monitoring and reviewing health and safety measures, reviewing risk assessments, accident books / reports and accident investigations annually. Reviews include a review of health and safety related complaints and sanctions taken against employees and / or pupils for health and safety breaches.

29.3 ILG are responsible for investigating accidents, incidents and work-related causes of sickness absences, if required. Such investigations may be required to discover the root causes of an accident to prevent a recurrence, to discipline employees or pupils or to brief lawyers for the purpose of obtaining legal advice or to aid litigation. The following HSE guidance document should be used when investigating incidents (including accidents and near misses): <http://www.hse.gov.uk/pubns/hsg245.pdf>. Further 'Incident Investigation Guidelines' are available from the Head of Operations.

29.4 The School will not sanction any internal investigation which may prejudice the investigations of outside agencies.

29.5 Where appropriate, the School will seek legal advice from the School's solicitors before commencing an internal investigation. No admission of liability on the School's behalf shall be made without legal advice (if required) and prior agreement from the School's insurers. As a minimum, anything reported under RIDDOR or upheld safeguarding allegations must also be reported to the Board level lead for health & safety and ILG's insurance brokers.

29.6 As outlined in the ILG Employment Manual, in certain circumstances, breaches of health and safety regulations and/or law and/or the Health and Safety at Work Rules may constitute gross misconduct and may result in instant dismissal and possibly civil or criminal proceedings. In any event a failure to comply with the appropriate standards will render an employee liable to disciplinary action.

Appendix 1 Guidance on risk assessment

A risk assessment is a careful examination of what in your work or activities could cause harm to people, so that you can weigh up whether you have taken enough precautions or should do more to prevent harm. A risk assessment is not about creating huge amounts of paperwork, but rather about identifying sensible measures to control real risks - those that are most likely and will cause the most harm.

The law does not expect you to eliminate all risk, but you are required to protect people "so far as is reasonably practicable".

When thinking about your risk assessment, remember:

- a hazard is anything that may cause harm, such trailing or bare electric cables, unrestrained windows on upper floors, shared fabric towels in washrooms and unlocked cupboards containing chemicals and / or cleaning fluids
- the risk is the chance, high or low, that somebody could be harmed by these and other hazards, together with an indication of how serious the harm could be.

Step 1: Identify the hazards

First you need to work out how people could be harmed.

Step 2: Decide who might be harmed and how

Identify groups of people who might be harmed and how they might be harmed, which includes employees, volunteers and helpers, pupils, visitors and contractors.

Step 3: Evaluate the risks and decide on precautions

Decide what to do about the risks. Compare what you currently do with what is accepted as good practice. If there is a difference, list what needs to be done.

When controlling risks, apply these principles, if possible in this order:

- try a less risky option
- prevent access to the hazard
- organise work to reduce exposure to the hazard
- issue personal protective equipment
- provide welfare facilities
- involving or consulting with workers.

Step 4: Record your findings and implement them

Make a record of your significant findings - the hazards, how people might be harmed by them and what you have in place to control the risks. Any record produced should be simple and focused on controls.

If you employ five or more people, the law requires you to record your findings. You can use the attached template (see Appendix 3) or download a template from the HSE website.

A health and safety checklist for classrooms can also be downloaded from the HSE website.

Step 5: Review your risk assessment and update if necessary

You should review what you are doing on a regular ongoing basis. When doing so, ask yourself:

- have there been any significant changes?
- are there improvements you still need to make?
- have employees or pupils spotted a problem?
- have you learnt anything from accidents or near misses?

Guidance on risk assessment of welfare issues

A risk assessment in the pupil welfare context is a careful examination of what could cause harm to pupil welfare and appropriate control measures, so that you can weigh up whether the School has taken adequate precautions or should do more to prevent harm.

The purpose of a risk assessment is not to create huge amounts of paperwork, but rather to identify sensible measures to control real risks - those that are most likely to occur and /or will cause the most harm if they do.

When thinking about your risk assessment in this context, remember:

- a welfare issue is anything that may harm a pupil, to include cyber-bullying or abuse
- the risk is the chance that a pupil could be harmed, together with an indication of how serious the harm could be if they are.

Step 1: Identify the issue

First you need to work out how pupils could be harmed. This will generally be set out in the concern raised about a pupil's welfare.

Step 2: Decide who might be harmed and how

Identify individual pupils or groups who might be harmed and how they might be harmed by the concern raised.

Step 3: Evaluate the risks and decide on precautions

Decide what to do about the risks.

Compare what you currently do with what is required by law, DfE guidance or is accepted good practice. If there is a difference, list what needs to be done to protect the pupil's welfare.

Step 4: Record your findings and implement them

Make a written record of your significant findings - the issue, how pupil(s) might be harmed and what arrangements the School has in place to control those risks.

There is no prescribed format for this record but any record produced should be simple and focussed on control measures and the steps the School proposes to take to manage the risk.

Step 5: Review your risk assessment and update if necessary

Review what you are doing for the pupils identified and across the school generally and monitor the efficacy of the measures you have put in place on a regular basis, or as required.

Appendix 2 Guidance on RIDDOR reporting

The School is obliged to report certain accidents, diseases and dangerous occurrences or near misses under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (**RIDDOR**):

Accidents involving staff

The School will report:

- work-related accidents resulting in death or "specified' injury" (including as a result of physical violence) must be reported immediately (major injury examples include: any loss of consciousness caused by head injury or asphyxia; amputation)
- work-related accidents which prevent the injured person from continuing with his / her normal work for more than seven days
- certain work-related diseases
- certain dangerous occurrences or near misses (reportable examples: bursting of closed pipes; electrical short circuit causing fire; accidental release of any substance that may cause injury to health).

Accidents involving pupils or visitors

The School will report accidents where the pupil or visitor is killed or is taken from the scene of the accident to hospital and where the accident arises out of or in connection with a "work activity".

In determining whether the accident arose out of a "work activity", the School should consider whether the accident was caused by factors, such as:

- a failure in the way a work activity was organised e.g. inadequate supervision on an educational visit
- the way in which equipment, machinery or substances were used
- the condition, design or maintenance of the School premises.

Further guidance can be found in Incident reporting in schools (accidents, diseases and dangerous occurrences): guidance for employers (HSE, EDIS1 (revision 3), October 2013), and on the HSE website.

Appendix 4 Miscellaneous

School Uniform

The School expects pupils to wear their school uniform at all relevant times.

On grounds of health and safety, the School does not allow pupils to wear jewellery. An exception is ear-ring studs in pierced ears, which are kept on for PE, but removed for swimming.

School Meals

The School will provide facilities for pupils to have a hot meal through the School's catering services and will ensure that free, fresh drinking water is available. A separate ILG Catering policy applies to this area.
